

ALVIN MALIK

Kota Serang, Banten • (+62)896-0339-6336 • alvinmalik1111@gmail.com

IT professional with a background in fullstack development, banking operations, and data management, currently transitioning into SAP consulting. Certified in SAP S/4HANA (Udemy, 2025) with hands-on experience in end-to-end application development, system integration, and process optimization. My three years as a Customer Service at PT Bank Central Asia gave me deep exposure to banking workflows, financial data handling, and compliance processes — directly applicable to SAP FICO and banking modules. Committed to leveraging both technical and business process expertise to deliver impactful SAP implementation solutions.

Experience

JAN 2019 - JAN 2020

Integration of Statistical Data Processing | Badan Pusat Statistik | Serang City

A Professional Map Processor with specialized experience in Banten Province, proficient in ArcGIS and QGIS applications, and involved in the 2020 Population Census (SP 2020). Responsible for maintaining and updating maps, including boundary delineation between villages, districts, and cities. Experienced in updating population figures at the levels of neighborhood units (RT), community units (RW), and villages, with skills in troubleshooting networks, software, and hardware. Additionally, involved in collecting and updating data on the economic activities of the community.

JAN 2020 – JAN 2021

Finished Good | PT. Nippon Indosari Corpindo | Serang

As a Professional in the Finished Goods department at PT. Nippon Indosari Corpindo, I have experience in conducting physical inspections of bread exiting the packing section. In my role, I am responsible for determining which bread is suitable for distribution, grouping bread by type, and sorting bread based on distribution requests. Additionally, I have responsibilities as the Person in Charge (PIC) for creating rotating break schedules for employees.

JAN 2021 – JAN 2022

Sorter | PT. Kantor Pos Indonesia | Serang City

As a sorter at PT. Pos Indonesia, I have experience in inspecting and sorting packages according to their destination regions. In my daily tasks, I am responsible for grouping packages based on their destination areas, repairing damaged packages, and handling hardware and printer troubleshooting. Additionally, I assist in maintaining the applications used and serve as the Person in Charge (PIC) Content Creator Youth at PT. Pos Indonesia, where I'm involved in generating new ideas to compete in the digital realm.

JAN 2022 – JAN 2025

Customer Service | PT. Bank Central Asia | Serang City

As a Customer Service at PT. Bank Central Asia, responsible for providing excellent service and effective solutions to customers' banking needs. Daily tasks included delivering clear explanations of banking products and services, assisting customers with digital banking machines (such as ATMs and CS Digital), and educating them on financial literacy and safe banking practices. Maintained a friendly and professional demeanor while resolving complaints, addressing concerns, and conducting preliminary investigations related to fraud or suspicious transactions, ensuring customer satisfaction and adherence to bank policies.

FEB 2025 – SEP 2025

IT Developer | PT. Lippo Karawaci Tbk | Tangerang Selatan

As an IT Developer at PT. Lippo Karawaci Tbk, responsible for developing and maintaining internal web-based applications to support business operations and improve workflow efficiency. Collaborated with business users and cross-functional teams to analyze requirements, design system solutions, and implement new features. Developed backend services, integrated databases and APIs, performed application testing, debugging, and system optimization to ensure reliability, performance, and security. Participated in deployment, maintenance, and technical documentation while providing ongoing support for existing applications.

OCT 2025 – Present

IT Developer | PT Yasunaga Indonesia | Serang

As a Fullstack Developer, responsible for developing and maintaining end-to-end web applications, covering frontend, backend, database, and API integration. Design and implement scalable software solutions using modern technologies while ensuring application performance, security, and usability. Collaborate with cross-functional teams to gather requirements, develop new features, perform testing, and deploy applications. Experienced in troubleshooting, system optimization, and delivering technology solutions that improve operational efficiency and user experience.
